*Celebrating Over 30 Years Helping Songwriters and Musicians in the Southwest.*

*Established 1977.*

Dear State Legislator,

ASA has been providing seminars, workshops, educational, promotional and networking opportunities for songwriters, musicians and bands since 1977. Our goal is to provide tools and opportunities to help these artists achieve their musical goals.

Many of our members have gone on to become successful writers, having placed songs in major TV shows & films, and with major and emerging recording artists.

Our seminars and workshops have featured successful music publishers, hit songwriters, and record producers including such dignitaries as David Foster. These top music industry people come here from major music markets to listen to ARIZONA songs and help Arizonans learn songwriting and the music business.

We are always glad to see something new added to the already robust music scene in Arizona. All this helps put Arizona on the big-time musical map! We think the DECADES MUSIC THEME PARK will be great for tourism and for helping bring awareness to what's going on with music in Arizona!

During the past few decades, music and entertainment have continued to be among the biggest exports from the United States! We are happy to see Arizona providing an ever increasing share.

We hope the DECADES MUSIC THEME PARK project will become a reality!
